

## Information to market participants and partners of German LNG Terminal GmbH

Brunsbüttel, 22 July 2022

### Expression of interest procedure for additional 1.8 bcma terminal capacity

German LNG Terminal GmbH (GLNG) is in the process of concluding final commercial contracts with its customers. On top of the current available capacity, for which an expression of interest procedure was executed in October / November 2019, additional terminal capacity of 1.8 bcma is now on offer. The capacity will become available from mid-2026 and will be offered on a long term basis.

In order to enable access to this additional capacity for all interested parties on a non-discriminatory basis, GLNG starts an expression of interest procedure (Interessenbekundungsverfahren) to determine the interest of market participants for the additional terminal capacity. Interested Parties need to register to participate in the procedure.

#### Registration

Interested parties need to register before **5 August 2022 17.00 hrs CEST** to be able to submit a booking request. Registration takes place by submitting the online form and subsequently signing a confidentiality agreement within the registration period.

#### Booking request

After registration and the signing of the confidentiality agreement, Interested Parties will be provided with additional information on the LNG terminal. Subsequently a booking request can be made through the conclusion of a duly signed Heads of Agreement before **19 August 2022 17.00 hrs CEST**.
